Why assignment
10-14-2025

My name is Nelson Wan, and I am currently pursuing a master's degree in Computer Science at Northeastern University. I earned my bachelor's degree in Animal Science from the University of California, Davis, and have hands-on experience working in animal care and research through organizations such as VCA Animal Hospital and the Elephant Nature Park in Thailand. While working in this field, I became increasingly interested in how technology and data can be used to improve research, animal health monitoring, and conservation efforts. This curiosity inspired me to pursue a degree in Computer Science, where I can gain the technical skills needed to design innovative tools and solutions that bridge the gap between science and technology. My goal is to build a career that combines my background in science with software development to create meaningful, data-driven impact in the world.
